Strip of Life Art™

Where Proprietary Innovation Meets Personal Memory

At the heart of every "Strip of Life Art™" commission lies a piece of proprietary technology that transforms a static canvas into a living archive. Inspired by the interactive mechanics of the game *Connect 4*, we have engineered a canvas embedded with a specially designed rail system, tailored to fit the bespoke dimensions of your painting. This innovative infrastructure is capable of holding up to **50 photograph plugs**—printed on high-definition glossy aluminum and adhered with magnetic facets. This system allows you to exchange, reorder, or update your images at any time, in any format, ensuring that your artwork remains as dynamic and fluid as your life itself.

An Homage to Connection

The soul of this project is deeply personal. The concept was born from the artist's own need to capture the fleeting, precious moments of his daughter's childhood. An invention created as an *"homage to being a girl dad."* Strip of Life Art™ is a high-touch contemporary painting series that marries your experiences and milestones with the artist's passion for brushstrokes and the emotion of color. By integrating your photos using strategic "color breakers" and aesthetic sequencing (such as placing a wedding "money shot" in the optimal visual slot), we alleviate the stress of choosing a "final" image. Why shouldn't your art evolve with your new memories?

About the Artist: Mr. Veru Narula

Mr. Veru Narula is a visual artist renowned for his captivating underwater paintings, which seamlessly blend traditional and digital media. His artwork aims to attract abundance, rekindle the need for self-actualisation and offer viewers a meditative escape from the daily grind.

Born on April 7, 1981, in Edison, NJ, Narula is a third-generation oil painter and engineer whose life and art uniquely synthesise technology, spirituality, and cultural heritage. As a first-generation American raised in the Hindu tradition, Veru cultivated a deep appreciation for both science and the sacred from a young age. This fusion has guided his artistic practice since he was seventeen.

Narula's impressive academic background includes degrees from Columbia University and the School of Visual Arts, with additional studies at the Museum of Modern Art. He also holds an Executive MBA from Columbia. His work has been exhibited in prestigious institutions such as the Smithsonian Museum of Art, Miami Art Basel, and the Queens Museum of Art.

His formative years were profoundly shaped by pivotal experiences, including witnessing the events of 9/11 while an engineering student at Columbia. This experience led to the publication of his first novel, "The Vital Breath", a yoga-political romance, and ignited a lifelong devotion to hatha yoga. The mantra he embraced, "The longer the breath, the calmer the mind", became a guiding principle in both his personal and creative life.

About (Cont.)

Four of Mr. Veru Narula's art pieces were embossed on a disk and sent aboard a SpaceX Falcon 9 spacecraft as part of the NASA Odysseus Mission, which landed on the South Side of the Moon on February 22nd, 2024, alongside works from 222 other talented artists, including Jeff Koons!

About (Cont.)

Veru's ascent in the New York art scene during the 2000s and 2010s was marked by significant milestones. His oil painting Kathak Dancers garnered a New York Times review and was subsequently acquired by the Rubin Museum after Donald Rubin visited Tabla Rasa Gallery. This painting later became part of a historic moment: its inclusion in the Lunarprise Mission, where art was etched onto quartz disks and launched on a Falcon 9 rocket to the Moon's south pole. Curated by Michael Nash for his Sundance award-winning film project, this made Veru one of the rare contemporary artists with work literally on the Moon.

In addition to Kathak Dancers, Veru contributed three more pieces to the Lunarprise: Pupil of Cosmic Discipline from his feminine divine series, Super Moon from his Strip of Life Art™ collection, and Mars Meditation from his Mars Imagination series. Mars Meditation, inspired by the Martian-like terrain of the Australian outback, represents the pinnacle of his spiritual and artistic expression. During its creation, he donned a 3D-printed space helmet and chanted Madonna's "Shanti/Ashtangi"—the same Sanskrit verse he quoted in his high school yearbook in 1998, symbolising a full-circle moment of purpose and passion.

Throughout his journey, Veru has confronted and embraced personal challenges, including coming to terms with his identity, managing bipolar disorder, and fully stepping into his Aries-driven, Mars-ruled nature. In October 2019, he declared his soul's purpose: "To Uplift Truth through Art and Help People."

In December 2022, Veru's career reached another peak when he debuted Ocean of Abundance at the Versace Mansion during Miami Art Basel. This work, combining hand-painted techniques with generative art, heralded a new era in his practice. There, he met influential figures such as Nova Spivack, Dallas Santana, and Lori Taylor. After Spivack's talk about his childhood dream of preserving civilisation, Veru gifted him "Mars Meditation". Spivack affirmed its rightful place on the Moon. Soon after, it was. From Edison, NJ, to Earth's only satellite, Veru Narula's life demonstrates how the intersection of breath, brush, and belief can elevate art beyond the limits of gravity.
